Subject Index Volume 11

A

Accelerated idioventricular rhythm
multiform accelerated idioventricular rhythm in acute myocardial infarction, 2:197-200

Active cables
for use with dry electrodes for electrocardiography, 1:71-74

Adriamycin
chronic electrocardiographic changes with adriamycin therapy, 3:233-238

Alcohol
electrophysiologic properties of, in man, 3:219-226

Alternation
of atrial cycle length in supraventricular tachycardia, 3:213-218

Amiodarone
effects of, 3: 253-260

Amplitude ratios
a graph for calculating, 1:91-92

Aneurysmectomy
significance of ECG changes after left ventricular aneurysmectomy, 3:247-252

Animal studies
effect of hypoxia on the refractoriness of the canine ventricular muscle, 1:15-22
experimental comparison of four inverse electrocardiographic constructs in the isolated rabbit heart, 1:57-65
factors affecting overdrive suppression of idioventricular pacemakers, 1:3-10
induction of sinus node reentry: its relation to inhomogeneous atrial conduction, 2:109-116
isolated T wave alternans elicited by hypocalcemia in dogs, 2:103-108
prediction of the functional refractory period of the atrio-ventricular node, 2:123-127
separation of the total TQ-ST deflection into its component TQ and ST deflections using a mobile epicardial wick electrode in porcine myocardial ischemia, 3:227-231
significance of dissociation of conduction in the canine His bundle, 4:339-342
ventricular tachyarrhythmias induced by premature beats during acute coronary occlusion, 1:33-38

Arrhythmias
pacemaker-induced, 2:203-208
refractory ventricular, in a patient with mitral valve prolapse, 3:289-295

Asystolic periods
induced by malfunction of pacemaker, 1:93-96

Atrial bigeminy and trigeminy
concealed, 2:185-189

Atrial conduction, inhomogeneous
relation to induction of sinus node reentry, 2:109-116

Atrial cycle length
alternation of, in supraventricular tachycardia, 3:213-218

Atrial fibrillation
assessment of echocardiographic left atrial enlargement in patients with, 3:269-272
chronic, and coronary artery disease, 1:67-69

Atrial repolarization
with metastatic atrial tumor, 3:297-300

Atrial tachycardia
sympathetically induced, 4:403-406

Atropine
effects on ventricular arrhythmias during acute coronary occlusion, 1:27-31

A-V block
in accidental hypothermia, 4:399-402

A-V node
A-V nodal Wenćkebach with 2:1 A-V block, 2:181-184
combined intra-hisian block and A-V nodal bypass, 1:75-80
prediction of the functional refractory period of, 2:123-127

B

Block
spontaneous, multilevel, 2:181-184
surface electrocardiogram in complete intra-His heart block, 2:151-158

"Brody-Effect"
a note on, 1:87-90

Bypass surgery
aorto coronary saphenous vein, and left ventricular aneurysmectomy, 3:247-252

C

Capacitance measurement
a new test for pacemaker leads, 4:379-384

Cardiac dipole
effects of the volume conductor on the apparent orientation of, 2:143-146

Cardiomyopathy
anterior QRS loop in hypertrophic cardiomyopathy, 2:129-136

chronic atrial fibrillation and coronary artery disease, 1:67-69
concealed atrial electrical activity, 3:301-305

Carotid sinus pressure
usefulness of in detecting the sick sinus syndrome, 3:261-268

Concealment
concealed atrial bigeminy and trigeminy, 2:185-189
concealed atrial electrical activity, 3:301-305
concealed pre-excitation, 3:209-211
intermittant concealed atrial conduction demonstrated through intracavitary leads, 1:85-86

Conduction
dissociation of conduction in the canine His bundle, 4:343-354
effects of alcohol on, 3:219-226
induction of sinus node reentry; its relation to inhomogeneous atrial conduction, 2:109-116
intermittent concealed atrial, 1:85-86
intra-hisiam, effect of phentolamine on, 4:391-394
pure anterior conduction delay, 4:315-319

Coronary artery disease (CAD)
chronic atrial fibrillation and, 1:67-69

Coronary occlusion, acute
ventricular tachyarrhythmias induced by premature beats during, 1:33-38

D

Dipole source
effect of a perfectly conducting sphere on, 1:87-90

Dry electrodes
active cables for use with, 1:71-74

Drug therapy
chronic electrocardiographic changes with Adriamycin therapy, 3:233-238
effect of Phentolamine on intra-hisian conduction, 4:391-394
effects of Amiodarone, 3:253-260
effects of Atropine on ventricular arrhythmias during acute coronary occlusion, 1:27-31

Duchenne electrocardiogram
in myotonia Dystrophica, 4:395-398

E

Echocardiography
assessment of echocardiographic left atrial enlargement in patients with atrial fibrillation, 3:269-272
echocardiographic left atrial enlargement. Comparison of VCG and ECG for detection, 4:355-359
vectorial analysis of echocardiographically determined left ventricular enlargement, 2:117-122

Electrocardiogram (ECG)
comparison with VCG for detection of left atrial enlargement, 4:355-359
effects of the volume conductor on the apparent orientation of a known cardiac dipole, 2:143-146
electrical characteristics of some commercial ECG electrodes, 1:23-26
in complete intra-His heart block, 2:151-158
quantitative technical quality assay method for, 3:277-283
study of new ECG electrode system, 3:285-288

Electrocardiographic changes
after left ventricular aneurysmectomy, 3:247-252
with Adriamycin therapy, 3:233-238

Electrocardiographic mapping
of the precordium in the coronary care unit, 1:97-100

Electrocardiographic recording technology
and diagnostic accuracy of myocardial infarction criteria, 4:321-330

Electrocardiographic voltages
effects of electrode area on, 2:147-150

Electrocardiography
active cable for use with dry electrodes for, 1:71-74
effects of electrode area on electrocardiographic voltages, 2:147-150
electrocardiographic mapping of the precordium, 1:97-100
experimental comparison of four inverse electrocardiographic constructs in the isolated rabbit heart, 1:57-65
functional significance of electrocardiographic changes after left ventricular aneurysmectomy, 3:247-252
graph for calculating amplitude ratios in, 1:91-92
His bundle electrocardiography, performed on a patient with accidental hypothermia, 4:399-402
paucity of electrocardiographic changes with Adriamycin therapy, 3:233-238

Electrodes
controlled study of a new ECG electrode system, 3:285-288
disposable, 1:23-26
electrical characteristics of, 1:23-26
electrode area, effects of, on electrocardiographic voltages, 2:147-150
impedance, 1:23-26
mobile epicardial wick, 3:227-231
offset potential, 1:23-26

Electrophysiology
electrophysiologic properties of alcohol in man, 3:219-266
electrophysiologic risk factors of syncope, 4:339-342
significance of dissociation of conduction in the canine His bundle. Electrophysiological studies in vivo and in vitro, 4:343-354
usefulness of carotid sinus pressure in detecting the sick sinus syndrome, 3:261-268

Electrovectorcardiography
assessment of echocardiographic left atrial en-

largement with atrial fibrillation. An electrovectorcardiographic study, 3:269-272

Exercise
P wave changes during, 4:361-368

F

Functional refractory period
of the AV node, 2:123-127

G

Graphs
a graph for calculating amplitude ratios, 1:91-92

H

Heart
block
pure anterior conduction delay: a variant "fascicular" defect, 4:315-319
ventriculophasic arrhythmia and synchronization in, 3:239-246
models
experimental comparison of four inverse electrocardiographic constructs in the isolated rabbit heart, 1:57-65
rate
modification of, in patients with pacemakers, 2:203-208

Hemiblock, transient
during the course of acute myocardial infarction, 2:165-170

High posterior infarction
vectorcardiographic criteria of, 2:159-163

His bundle
electrocardiography
diagnostic value of, in a patient with complex electrophysiological abnormalities, 1:75-80
performed on a patient with accidental hypothermia, 4:399-402
His-Purkinje system, 4:315-319
potentials, fractionated, induced in dogs, 4:343-354
surface ECG in complete intro-His heart block, 2:151-158

Hypocalemia
isolated T wave alternans elicited by, in dogs, 2:103-108

Hypothermia, accidental
A-V block in, 4:399-402

Hypoxia
effect of on refractoriness of the canine ventricular muscle, 1:15

I

Image theory
in studying the effect of a perfectly conducting sphere on a dipole source, 1:87-90

Intracavitary leads
intermittent concealed atrial conduction demonstrated through, 1:85-86

Intra-Hisian block, combined
and A-V nodal bypass, 1:75-80

Intra-Hisian conduction; see conduction

Inverse electrocardiography
roles of TMD and DPQP constructs in, 1:57-65

Ischemic heart disease
prominent anterior QRS force in, 1:39-46

Isolated T wave alternans (TWA)
elicited by hypocalcemia in dogs, 2:103-108

J

Journal of Electrocardiology
tenth anniversary of, 1:1-2

J wave
A-V block in accidental hypothermia, 4:399-402

L

Left atrial enlargement
comparison of VCG and ECG in detecting, 4:355-359
in patients with atrial fibrillation, 3:269-272

Left atrial overload
P wave changes during exercise in patients with, 4:361-368

Left atrial rhythm
in man, 4:375-378

Left bundle branch block (LBBB)
in the presence of acute myocardial infarction, 2:165-170
vectorcardiographic study of initial QRS forces in, 4:307-314

Left septal fascicular block
prominent anterior QRS force as a manifestation of, 1:39-46

Left stellate ganglion block
successful treatment of sympathetically induced atrial tachycardia by, 4:403-406

Left ventricular enlargement
a vectorial analysis of echocardiographically determined, 2:117-122

M

Maps
body surface potential maps, 2:201-202
electrocardiographic mapping of the precordium in the coronary care unit, 1:97-100
precordial ST-segment mapping, 4:369-374

Metastatic atrial tumor
case report with electrocardiographic-pathologic correlation, 3:297-300

Mitral valve prolapse
refractory ventricular arrhythmias in a patient with, 3:289-295
ventricular extrastimulation in the mitral valve prolapse syndrome, 2:137-142

Model
of cardiac electrical activity, 2:171-180

Morse theory
application to the study of the potential extrema of body surface potential maps, 2:201-202

Myocardial infarction
acute, with intermittant bundle branch and hemiblock, 2:165-170
analysis of maps and standard ECGs in patients with inferior myocardial infarction, 4:307-314
diagnostic accuracy of criteria, 4:321-330
multiform accelerated idioventricular rhythm in acute, 2:197-200
precordial electrocardiographic mapping in detecting extension of acute, 1:97-100
vectorcardiographic study of initial QRS forces in left bundle branch block associated with, 4:307-314

Myocardial ischemia
separation of the total TQ-ST deflection into its component TQ and ST deflections using a mobile epicardial wick electrode in porcine myocardial ischemia, 3:227-231

Myocardial scar
vectorcardiographic identification of, 3:273-276

Myopathic pattern
Duchenne ECG in myotonia dystrophica, 4:395-398

O

Osborne wave
A-V block in accidental hypothermia, 4:399-402

Overdrive suppression
Of idioventricular pacemakers and associated potassium shifts, 1:3-10

P

Pacemaker
a new hazard in the use of an external demand, 1:93-96
a new test for pacemaker leads, 4:379-384
demand pacemaker slowing: a simple bedside technique, 2:203-208
effects of the volume conductor on the apparent orientation of a known cardiac dipole, 2:143-146
idioventricular factors affecting overdrive suppression of, 1:3-10
hazards in the use of external, 3:306
shifting, 4:403-406
therapy in sick sinus syndrome, 1:11-14

Parasystole
simulating ventricular bigeminy with Wenckebach-type coupling prolongation, 4:385-390

P-Delta segment
time relationship of in the WPW syndrome, 1:47-56

Phentolamine
effect of, on intra-hisian conduction, 4:391-394

Potassium shifts
factors affecting overdrive suppression and associated potassium shifts, 1:3-10

Precordial ST-segment
mapping, 4:369-374

Preexcitation
alternating WPW pattern, 1:81-84
concealed, 3:209-211

Primary myocardial disease
differentiation by vectorcardiographic criteria, 2:159-163

Primary systemic amyloidosis
a case of sick sinus syndrome in, 2:191-196

Programmed electrical stimulation
of the heart, effects of amiodarone studied by, 3:253-260

PR segment changes
and metastatic atrial tumor, 3:297-300

P waves
changes during exercise, 4:361-368
in left atrial rhythm in man, 4:375-378

Q

QRS forces
vectorcardiographic study of initial, 4:307-314
prominent anterior, as a manifestation of left septal fascicular block, 1:39-46

QRS loop, anterior
in hypertrophic cardiomyopathy, 2:129-136

QRS-T angle
effect of gradient of transmembrane action potential through the ventricular wall on, 2:171-180

Quality control
for ECGs, 3:277-283

Q wave
measurement of, 4:321-330

R

Refractory period
effect of hypoxia on, 1:15-22

Right ventricular hypertrophy
differentiation by vectorcardiographic criteria, 2:159-163

S

Sick sinus syndrome
a case of, in primary systemic amyloidosis, 2:191-196
a study of 50 cases, 1:11-14
usefulness of carotid sinus pressure in detecting, 3:261-268

Sinus node
reentry, induction of, 2:109-116

Summation method
the U vector loop, as studied by, 4:331-338

Synchronization
ventriculophasic arrhythmia and, 3:239-246

Syncopal episodes
effect of phentolamine on intra-hisian conduction, 4:391-394
in patients treated with pacemaker therapy, 1:11-14

Syncope
electrophysiologic risk factors of, 4:339-342

T

Tachycardia
atrioventricular, 3:209-211
paroxysmal, re-entrant supraventricular, effects of amiodarone on, 3:253-260
supraventricular, 3:213-218

T.A.F. technique
in diagnosis of concealed atrial rhythms, 3:301-305

Tenth anniversary
of the Journal of Electrocardiology, 1:1-2

TQ-ST deflections
separation of, 3:227-231

Transmembrane action potential
effect of the gradient of, 2:171-180

T-wave polarity
theoretical analysis of, 2:171-180

U

Ultrasound
echocardiographically determined left ventricular enlargement, a vectorial analysis of, 2:117-122

U vector loop
in normal and various abnormal states as studied by the summation method, 4:331-338

V

Vagal stimulation
effects on ventricular arrhythmias during acute coronary occlusion, 1:27-31

Valvular heart disease
vectorcardiographic study of initial QRS forces in left bundle branch block associated with myocardial infarction, primary myocardial disease and valvular heart disease, 4:307-314

Vectorcardiography
U vector loop in normal and various abnormal states as studied by the summation method, 4:331-338

Vectorcardiogram
compared with ECG for detecting LA enlargement, 4:355-359
use of, in diagnosis of HCM, 2:129-136
vectorial analysis of echocardiographically determined left ventricular enlargement, 2:117-122

Ventricular arrythmias
effects of vagal stimulation and atropine on, 1:27-31

Ventricular bigeminy
parasystole simulating, 4:385-390

Ventricular extrastimulation
in the mitral valve prolapse syndrome, 2:137-142

Ventricular pre-excitation
time relationship of the P-Delta segment in the WPW syndrome, 1:47-56

Ventricular reentry
evidence for, in ventricular extrastimulation in the mitral valve prolapse syndrome, 2:137-142

Ventricular tachyarrhythmias
induced by premature beats during acute coronary occlusion, 1:33-38

Ventriculophasic arrhythmia
and synchronization 3:239-246

Volume conductor
effects of, on the apparent orientation of a known cardiac dipole, 2:143-146

W

Wenckebach-type exit block
parasystole simulating ventricular bigeminy with Wenckebach-type coupling prolongation, 4:385-390

Wolff-Parkinson-White pattern
alternating, 1:81-84

Wolff-Parkinson-White (WPW) syndrome
time relationship of the P-Delta segment in, 1:47-56

JOURNAL OF ELECTROCARDIOLOGY

Table of Contents
Volume 11, 1978

Number 1

Editorial:
The Tenth Anniversary of the Journal of Electrocardiology
by *Zang Z. Zao* 1
Original Communications:
Factors Affecting Overdrive Suppression of Idioventricular Pacemakers and Associated Potassium Shifts
By *D.J. Krellenstein, M.B. Pliam, C. McC. Brooks and M. Vassalle* 3
The Sick Sinus Syndrome. A Study of 50 Cases
By *L. Gould, C.V.R. Reddy and W.H. Becker* 11
The Effect of Hypoxia on the Refractoriness of the Canine Ventricular Muscle
By *H. Iinuma and K. Kato* 15
The Electrical Characteristics of Some Commercial ECG Electrodes
By *R.P. Patterson* 23
Effects of Vagal Stimulation and Atropine on Ventricular Arrhythmias During Acute Coronary Occlusion
By *M.S. Yoon, J.D. Fondacaro and J. Han* 27
Ventricular Tachyarrhythmias Induced by Premature Beats During Acute Coronary Occlusion
By *B.G. Goel, J. Han, R.A. Fabregas and M.S. Yoon* 33
Prominent Anterior QRS Force as a Manifestation of Left Septal Fascicular Block
By *Y. Nakaya, Y. Hiasa, Y. Murayama, S. Ueda, T. Nagao, T. Niki, H. Mori and Y. Takashima* 39
Time Relationship of the P-Delta Segment in the Wolff-Parkinson-White Syndrome
By *P.W. Duchosal, L. DeRoy and J. Odier* 47
Experimental Comparison of Four Inverse Electrocardiographic Constructs in the Isolated Rabbit Heart
By *D.M. Mirvis, F.W. Keller and J.W. Cox* 57
Chronic Atrial Fibrillation and Coronary Artery Disease
By *A.H. Haddad, V.K. Prchkov and D.C. Dean* 67
Instrumentation:
Active Cables for Use with Dry Electrodes for Electrocardiography
By *J.D. Bourland, L.A. Geddes, G. Sewell, R. Baker and J. Kruer* 71
Case Studies:
Combined Intra-Hisian Block and A-V Nodal Bypass
By *P. Schweitzer and H. Mark* 75
Alternating Wolff-Parkinson-White (Preexcitation) Pattern
By *E. Lichstein, S. Goyal, K. Chadda and P.K. Gupta* 81
Intermittent Concealed Atrial Conduction Demonstrated Through Intracavitary Leads
By *S. Cotoi, C. Georgescu and D. Moldovan* 85
Annotations:
A Note on the "Brody-Effect"
By *Y. Rudy and R. Plonsey* 87
A Graph for Calculating Amplitude Ratios
By *J. Wartak* 91
Recent Progress in Cardiac Pacing:
A New Hazard in the Use of an External Demand Pacemaker
By *Y. Hasin, Y. Mahler and S. Rogel* 93
Review:
Electrocardiographic Mapping of the Precordium in the Coronary Care Unit
By *J.E. Madias and W.B. Hood, Jr.* 97
In Memoriam: David Scherf
By *J. Cohen* 101

Number 2

Original Communications:
Isolated T Wave Alternans Elicited by Hypocalcemia in Dogs
By *F. Navarro-López, J. Cinca, G. Sanz, J. Magriña and A. Betriu* 103
Induction of Sinus Node Reentry: Its Relation to Inhomogeneous Atrial Conduction
By *S. Ogawa, L. S. Dreifus and M. J. Osmick* 109
Hypertrophy or Dilatation? A Vectorial Analysis of Echocardiographically Determined Left Ventricular Enlargement
By *P. J. Browne, S. Sridhar, K. B. Desser, A. Benchimol and C. Sheasby* 117
Prediction of the Functional Refractory Period of the Atrioventricular Node
By *P. E. Dresel and R. Y. K. Man* 123
Anterior QRS Loop in Hypertrophic Cardiomyopathy
By *C-H. Chen and C. Kawai* 129
Ventricular Extrastimulation in the Mitral Valve Prolapse Syndrome. Evidence for Ventricular Reentry
By *T. R. Engel, S. G. Meister and W. S. Frankl* 137
Effects of the Volume Conductor on the Apparent Orientation of a Known Cardiac Dipole
By *Y. Salu, D. Laughlin, J. Rogers, and M. Marcus* 143
Effects of Electrode Area on Electrocardiographic Voltages
By *A. S. Berson and H. V. Pipberger* 147
The Surface Electrocardiogram in Complete Intra-His Heart Block
By *N. D. Berman* 151
Vectorcardiographic Criteria of High Posterior Infarction: Differentiation from Normal Subjects, Right Ventricular Hypertrophy and Primary Myocardial Disease
By *K. Suzuki and S. Toyama* 159
Studies of Acute Myocardial Infarction with Intermittent Bundle Branch and Hemiblock
By *L. Schamroth, H. D. Friedberg and J. de Kock* 165
Theoretical Analysis of T-Wave Polarity Based on a Model of Cardiac Electrical Activity
By *M. Inoue, M. Hori, F. Kajiya, H. Kusuoka, H. Abe, T. Furukawa and S. Takasugi* 171
Case Studies:
Two-to-One A-V Block with Four-to-Three A-V Nodal Wenckebach, A Form of Spontaneous Multilevel Block
By *R. Feldman, L. N. Horowitz and M. E. Josephson* 181
Concealed Atrial Bigeminy and Trigeminy
By *M. N. Levy, N. Kerin and M. Rubenfire* 185
A Case of Sick Sinus Syndrome in Primary Systemic Amyloidosis
By *N. Isokane, N. Fukushima, T. Miyazaki and I. Dohi* 191
Multiform Accelerated Idioventricular Rhythm in Acute Myocardial Infarction
By *S. Sclarovsky, B. Strasberg and J. Agmon* 197
Annotation:
A Note on the Application of Morse Theory to the Study of the Potential Extrema of Body Surface Potential Maps
By *R. Grossman* 201
Recent Progress in Cardiac Pacing:
Demand Pacemaker Slowing: A Simple Bedside Technique
By *M. B. Waxman, J. F. Bonet and R. W. Wald* 203

Number 3

Editorial:
Concealed Pre-Excitation
By *D. Krikler* 209
Original Communications:
Alternation of Atrial Cycle Length in Supraventricular Tachycardia
By *R. Childers and M. Gambetta* 213
Electrophysiologic Properties of Alcohol in Man
By *L. Gould, C. V. R. Reddy, W. Becker, K-C. Oh and S. G. Kim* 219
Separation of the Total TQ-ST Deflection into Its Component TQ and ST Deflections Using a Mobile Epicardial Wick Electrode in Porcine Myocardial Ischemia
By *T. Akiyama and P. Serrino* 227
A Paucity of Chronic Electrocardiographic Changes with Adriamycin Therapy
By *S. K. Weaver, P. K. Fulkerson, R. P. Lewis and C. V. Leier* 233
Ventriculophasic Arrhythmia and Synchronization: Clinical Observations and Study on an Electrical Analogue
By *D. A. Sideris, L. P. Anthopoulos and S. D. Moulopoulos* 239
Functional Significance of Electrocardiographic Changes after Left Ventricular Aneurysmectomy
By *S. Richter, J. M. Aranda, A. Embi, R. Sung, N. El-Sherif and B. Befeler* 247
Effects of Amiodarone Studied by Programmed Electrical Stimulation of the Heart in Patients with Paroxymal Re-entrant Supraventricular Tachycardia
By *A. Waleffe, P. Bruninx and H. E. Kulbertus* 253
Usefulness of Carotid Sinus Pressure in Detecting the Sick Sinus Syndrome
By *L. Gould, C. V. R. Reddy, W. H. Becker, K-C. Oh and S. G. Kim* 261
Assessment of Echocardiographic Left Atrial Enlargement in Patients with Atrial Fibrillation. An Electrovectorcardiographic study
By *H. Bartall, K. B. Desser, A. Benchimol and B. J. Massey* 269
Vectorcardiographic Identification of Myocardial Scar: A Discriminative Study with Automatically Processed Vectorcardiographic Information
By *R. O. Bizarro, P. C. O'Brien, J. L. Titus and R. E. Smith* 273
Technical Communications:
A Quantitative Technical Quality Assay Method for Electrocardiograms
By *L. T. Sheffield, D. I. Roitman and S. Kansal* 277
A Controlled Study of a New ECG Electrode System
By *L. T. Sheffield, D. I. Roitman and S. Kansal* 285
Case Studies:
Refractory Ventricular Arrhythmias in a Patient with Mitral Valve Prolapse. Successful Control with Mitral Valve Replacement
By *A. Ross, J. A. DeWeese and P. N. Yu* 289
Metastatic Atrial Tumor: Case Report with Electrocardiographic-Pathologic Correlation
By *A. L. Goldberger and M. Ludwig* 297
Concealed Atrial Electrical Activity
By *A. Bayés de Luna, F. X. Boada, A. Casellas, C. Crexells, J. Dominguez, M. G. Moll, J. Juliá, L. Martret, R. Oter, M. Román and J. Vilaplana* 301
Letter to the Editor:
Hazards in the Use of External Pacemakers
By *H. Kostinsky* 306

Number 4

Original Communications:
Vectorcardiographic Study of Initial QRS Forces in Left Bundle Branch Block Associated with Myocardial Infarction, Primary Myocardial Disease and Valvular Heart Disease
By A. Benchimol, H. Bartall, K.B. Desser and B.J. Massey 307
Pure Anterior Conduction Delay: A Variant "Fascicular" Defect
By. J.A. Reiffel and J.T. Bigger, Jr. 315
Changing Electrocardiographic Recording Technology and Diagnostic Accuracy of Myocardial Infarction Criteria. Improved Standards for Evaluation of ECG Measurement Precision
By P.M. Rautaharju, D. Seale, R. Prineas, H. Wolf, R. Crow and J. Warren 321
The U Vector Loop in Normal and Various Abnormal States as Studied by the Summation Method
By Y. Sakamoto, T. Sano, F. Suzuki and M. Yamamoto 331
Electrophysiologic Risk Factors of Syncope
By H. Boudoulas, S.F. Schaal and R.P. Lewis 339
The Significance of Dissociation of Conduction in the Canine His Bundle. Electrophysiological Studies in Vivo and In Vitro
By B.J. Scherlag, N. El-Sherif, R.R. Hope and R. Lazzara 343
Echocardiographic Left Atrial Enlargement. Comparison of Vectorcardiogram and Electrocardiogram for Detection
By. H. Bartall, K.B. Desser, A. Benchimol and B.J. Massey 355
P Wave Changes During Exercise in Normal Subjects and in Patients with Hemodynamic Evidence of Left Atrial Overload
By M. Ahmad and C.G. Blomqvist 361
Precordial ST-Segment Mapping 5. Analysis of Maps and Standard Electrocardiograms in Patients with Inferior Myocardial Infarction
By J.E. Madias 369
Left Atrial Rhythm In Man: An Experimental Study
By M. Khalilullah, N.K. Shrestha and S. Padmavati 375
Recent Progress in Cardiac Pacing:
A New Test for Pacemaker Leads: Capacitance Measurement
By A.E. Aubert, H. Ector, H. De Geest, A. Peytier and W. Geysen 379
Case Studies:
Parasystole Simulating Ventricular Bigeminy With Wenckebach-Type Coupling Prolongation
By P.R. Lightfoot 385
The Effect of Phentolamine on Intra-Hisian Conduction
By L. Gould, C.V.R. Reddy, K.C. Oh, S.G. Kim and W. Becker 391
Duchenne Electrocardiogram in Myotonia Dystrophica
By J. Zatuchni and A. Baute 395
A-V Block in Accidental Hypothermia
By A.I. Jacob, E. Lichstein, S.D. Ulano, K.D. Chadda, P.K. Gupta and B.M. Werner 399
Sympathetically Induced Atrial Tachycardia. Successful Treatment By Left Stellate Ganglion Block
By H. Tanaka, S-I. Minagoe, T. Kashima, S. Nishi and Y. Toyama 403
Letters to the Editor:
The Tall R Wave in the Right Precordial Leads
By M.J. Zema; S. Toyama 407
Index 409
